

context, pinned in the system slot for the whole session

{sys} User profile — name: Priya Raman; email: priya.raman@gmail.com (/sys)

(a) The usual pipeline — a separate recognizer + a silence timer

(b) Ours — the recognizer emits the transcript AND the end-of-turn token, inline

HOLD — the 3-3-4 pattern predicts more digits

FIRE — complete + 0.3 s silence heard, +0.42 s
