

closed → open weights + recipe

WebRTC / Silero VAD
+ timeout cascades

Smart Turn (acoustic
EOT, open recipe)

commercial cascades
(classic endpointing)
learned acoustic EOT
(Helwani et al.)

Kyutai STT (semantic-VAD
head, weights only) **this work** ★
text EOU on separate STT
Drakeet-EOU (in-transcript
(LiveKit, TEN) token, recipe undocumented)
joint E2E endpointing
(RNN-T + </s>)

Deepgram Flux,
OpenAI semantic_vad
UAF
(paper only)

end-of-turn decision signal: acoustic (silence/VAD) → semantic + acoustic (in-model)
